# Spartan Doors - Solid Core Door

## Solid Core Door

An access door with timber core, finished with timber sheets and internal edge strips.

### Description

The Solid Core Door is a multi-purpose door ideal for internal and external use in industrial, commercial and residential applications.

It features timber rails used to form a frame around material options ranging from polystyrene and MR particleboards to external grade HMR. Varying finishes provide a professional look while maintaining functionality, durability and security.

Spartan Solid Core doors can accommodate any type of hardware which can be fitted upon request. Vision panels and air grille options are also available. Framing selections depend on single or double width and swing choice.

### Application

Warehouses, basement offices, schools, maintenance facilities, hospitals, residential units, shopping centres.

### Finishes

The standard finish is ply sheet. Other finishes available include MDF, duracote and veneer. Metal sheets with thicknesses up to 1.5mm can be used to increase durability and security.

All statements, technical information, and recommendations related to Spartan's products are based on information believed to be reliable, but the accuracy or completeness is not guaranteed. Before using this product, you must evaluate it and determine if it is suitable for your intended application.
