

“ WE ARE COMMITTED TO HAVING THE FASTEST  
LEAD TIMES IN THE INDUSTRY ”

*Paula Beauchamp - Owner*

## HOW LONG DOES IT TAKE TO MAKE A PIZZA?

It takes the same amount of time to build a door or frame as it does to make a pizza. So why can you get a pizza delivered in under an hour but doors and frames take a month? We don't think it should take a month, and while we aren't quite able to deliver a door and frame in under an hour (yet) we do maintain that we have the best lead times in the country, especially for custom sizes.

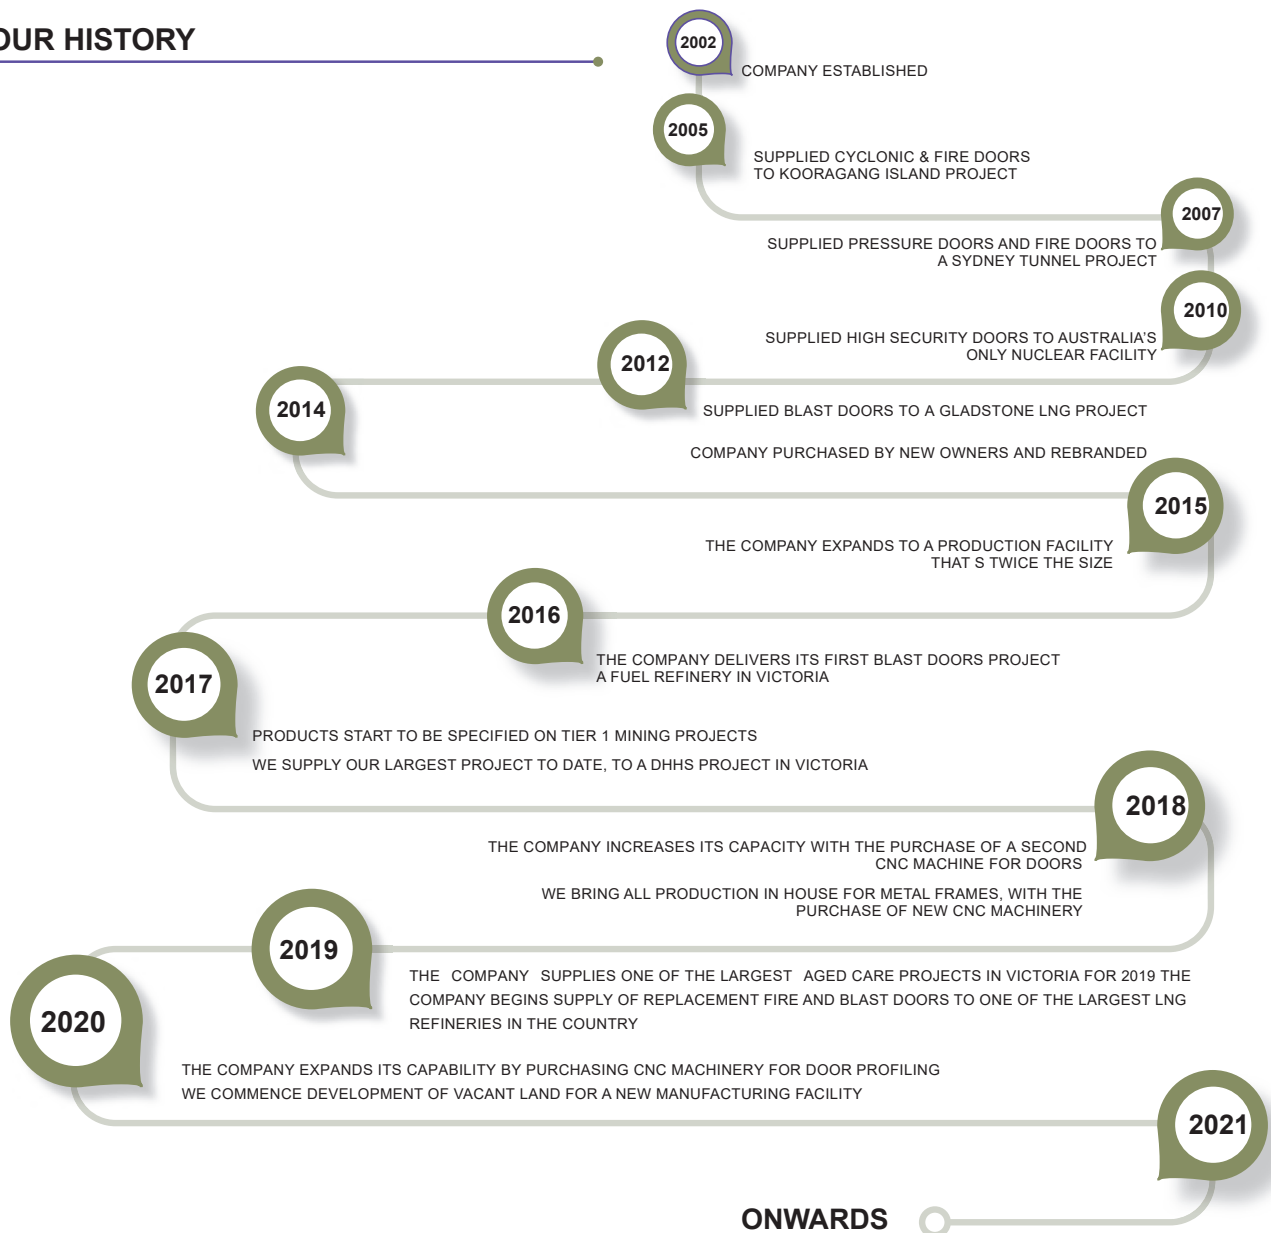

## WELCOME

Founded in 2002, Spartan Doors began as a low volume manufacturer of standard and specialised doors in Cardiff, New South Wales. Initially the business supplied local construction projects as well as specialised doors to mining infrastructure projects. Subsequently being taken over by North Eastern Door Frames in 2024.

Since then, the business has grown and now supplies construction projects across Australia, and has expanded its product range to work with builders, carpenters, building suppliers, and large private and government infrastructure projects.

The rapid expansion resulted in a move to a larger manufacturing facility in September 2015, based in Kurri Kurri, New South Wales (20 minutes from Newcastle). Now located at 36 Enterprise Drive, Beresfield NSW 2322.

## OUR HISTORY

## WHAT WE DO

---

North Eastern Door Frames manufactures standard and specialised doors & frames for residential, commercial and industrial projects across Australia. Our products are designed to serve three market segments:

- Timber Frames (KDHW & MDF)
- Pressed Metal Door Frames
- Steel Clad Doors
- Radiation Doors
- Switchroom Doors
- Security Doors
- Acoustic Doors
- Blast Doors
- Bullet Proof Doors
- Cyclone Doors
- InstallReady®

## OUR VALUES

---

### TIME & QUALITY

Deliver the right product on time to all projects.

### GROWTH

Strive for continual improvement through upgraded technology.

### TEAM

Build a world class team that symbolises Passion, Intelligence and Innovation.

### SAFETY & ENVIRONMENT

Strive for excellence in the areas of safety and environmental sustainability.

## QUALITY

Having the fastest lead times in the country is irrelevant if the product arrives on site incorrect, incomplete or non-compliant, because speed without accuracy simply transfers risk and cost from the factory to the project. So we prioritise right-first-time delivery over headline speed, ensuring our specifications, quality controls and compliance checks are disciplined and robust before product leaves the factory.

## PEOPLE

As part of our commitment to offering the fastest lead times in the country, we see staff development as a priority. Establishing close working relationships with industry specific RTO's has meant that our staff are offered the opportunity to achieve nationally recognised vocational qualifications and have continuous industry training ensuring our standards are always maintained.

## RESEARCH AND DEVELOPMENT

Although we offer a standard range of products and services, we are also constantly researching and developing new ways to meet our clients various needs. With this in mind we are continuously implementing new products as well as new fabrication techniques to existing products.

## ENVIRONMENT

At NEDF Pty Ltd, we aim to minimise our impact on the natural environment. With diligent supplier selection, we are able to offer products to Green Star accredited building projects while minimising off cuts and waste within our production facility.

Waste is recycled where possible, if it can't be recycled, alternative uses for the offcuts are found, such as packaging and donations.
